HOME PRODUCTS

A HOME STRAIGHT OUT OF A MAGAZINE

Where else do we relax and spend most of our free time than in our homes? And since cleanliness, fragrance, and shine only make our homes cozier, we shouldn't forget about it. Gone are the days when cleaning the house meant stress, fatigue, and hard work. Thanks to Druchema and its household products, everything is

different now. Cleaning agents that only need to be applied and wiped off, polishing products with a self-polishing additive, or gentle cleaning emulsions that care for the skin of our hands. This is 21st-century household care. Relax and enjoy your free time while effortlessly achieving a home straight out of a magazine.

EFFORTLESS CLEANING

Household care and cleaning no longer have to be among the least favorite activities. Druchema keeps up with the times and develops products that are elegant and well-designed, but most importantly, that practically work for you. Simply apply them, wait for

the dirt to be released, and then just wipe or rinse the surface. No more scrubbing or damaging your skin with harsh detergents. The household care products also take care of your hand skin while leaving your home or apartment freshly scented.

ONE CLEANING SESSION AND YOU'RE DONE

Thanks to modern technologies that Druchema's products respect, you can even delay the next cleaning. Many products create a protective layer on the surface after cleaning, preventing rapid re-soiling, allowing you to enjoy the cleanliness, fragrance, and shine for longer. Additionally, you don't need to worry

about leaving the cleaning for a moment. Many cleaning agents have a gel consistency, so they don't run off even on vertical surfaces. What more could you wish for than to relax even during cleaning? With Druchema, you'll see that even spring, autumn, or pre-Christmas cleaning isn't a nightmare.

PRODUCTS FOR THE HOUSEHOLD

11402031 BISTROL SELF-POLISHING WAX EMULSION FOR FLOORS

Product detail: Bistol is used for polishing and preserving non-absorbent floor coverings (rubber, PVC, linoleum, various types of tiles, natural and artificial stone). Bistol gives treated surfaces a silky shine and creates a protective film on the surface, reducing contamination and damage.
Instructions for use: Apply Bistol to a washed floor with an absorbent cloth, sponge, or mop in a uniform thin layer. For a high shine, the floor can be polished again after drying.

Content: 500 ml	Expiration: 36 months
Units per pack: 10	EAN: 8594825001202
Units per pallet: 840	ITF: 18594825001209

11401031 BISTROL SPECIAL Self-polishing wax emulsion with an anti-slip additive

Product detail: Bistol Special is used for polishing and preserving non-absorbent floor coverings (rubber, PVC, linoleum, tiles). Thanks to its anti-slip treatment, it is particularly suitable for public spaces (schools, kindergartens, offices, social facilities, etc.). Bistol Special gives treated surfaces a silky shine and creates a protective film on the surface, reducing contamination and damage.
Instructions for use: Apply Bistol Special to a washed floor with an absorbent cloth, sponge, or mop in a uniform thin layer. After drying, you can polish the floor again to achieve a more pronounced shine.

Content: 500 ml	Expiration: 36 months
Units per pack: 10	EAN: 8594825001073
Units per pallet: 840	ITF: 18594825001070

11530231 BISTROL TILES AND POLISHED STONE

Product detail: Anti-slip effect. Improved formula with increased content of cleaning agents and waxes that ensure a pleasant shine after cleaning the surface. Practical packaging for better handling and use of the product. Pleasant and long-lasting fragrance. Thanks to the preservation and care agents, the cleaned surface remains more resistant to dirt buildup. Subsequent cleaning is also made easier. The product is biodegradable.
Instructions for use: Dose 3-4 caps per 5 liters of water according to the degree of contamination. Dip the cleaning cloth or mop into the solution, wring out as needed, and clean the dirty floor as usual.

Content: 750 ml	Expiration: 36 months
Units per pack: 6	EAN: 8594825007181
Units per pallet: 450	ITF: 18594825007188

11530631 BISTROL EXTRA WOOD

Product detail: Anti-slip effect. Improved formula with increased content of cleaning agents and waxes that ensure a pleasant shine after cleaning the surface. Practical packaging for better handling and use of the product. Pleasant and long-lasting fragrance. Thanks to the preservation and care agents, the cleaned surface remains more resistant to dirt buildup. Subsequent cleaning is also made easier. The product is biodegradable.
Instructions for use: Dose 3-4 caps per 5 liters of water according to the degree of contamination. Dip the cleaning cloth or mop into the solution, wring out as needed, and clean the dirty floor as usual.

PRODUCTS FOR THE HOUSEHOLD

11210042 MEFISTO® KITCHEN Cleaner for stoves, stainless steel, dishes, and tiles

Product details: A chemical preparation designed to remove grease and kitchen dirt from stoves, stainless steel surfaces, dishes, and tiles. The preparation is effective on greasy surfaces, enamelled or stainless steel surfaces, tiles, sinks, faucets, pipes, and hoods. Not suitable for aluminum, chrome, lacquered, and painted surfaces. Leaves a pleasant lemon scent and gives surfaces a shine.
Instructions for use: Apply a thin layer of the undiluted preparation to the dirty surface, let it work for 10-30 minutes depending on the level of dirt, then wipe clean.

Content: 500 ml	Expiration: 36 months
Units per pack: 6	EAN: 8594825000779
Units per pallet: 450	ITF: 18594825000776

11280031 MEFISTO® FOR FIREPLACE GLASS Cleaner for fireplace glass, inserts, and grills

Product details: A chemical preparation designed to remove soot and greasy burnt dirt from fireplace glass, inserts, and grills. Suitable for cleaning glass doors of fireplaces and stoves, grills, and grill grates. Can also be used for cleaning oven racks. The preparation is thick, adheres well to vertical surfaces, and does not drip. Leaves a pleasant lemon scent and gives surfaces a shine.
Instructions for use: Apply an even layer of the undiluted product to the dirty surface, let it work for 10 minutes depending on the level of dirt, then wipe clean.

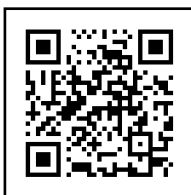

Content: 500 ml	Expiration: 36 months
Units per pack: 6	EAN: 8594825002025
Units per pallet: 450	ITF: 18594825002022

11341041 MYJETO EXTRA Degreaser and cleaning agent for heavily soiled surfaces, including wooden floors

Product details: The preparation is designed for floors and surfaces made of various materials (marble, tiles, linoleum, laminate, PVC, etc.). It quickly and easily removes all types of dirt such as grease, dust, and everyday household grime. Ideal for cleaning surfaces after construction or renovation. Myjeto Extra is also suitable for use with cleaning machines. It contains a mixture of active ingredients and natural substances that provide a long-lasting shine to the surfaces.
Instructions for use: For everyday cleaning, dilute 2-3 caps (60-90 ml) of the product in 5 liters of water. For cleaning heavily soiled floors, use the product undiluted. For cleaning wooden floors (parquet), use with a mop and then dry the surface.

Content: 1 l	Expiration: 36 months
Units per pack: 8	EAN: 8594825006078

01361
PRIX BLOCK FOR TANK - ORANGE

Product details: A WC block for the flush tank, including built-in cisterns. It deodorizes, cleans, colors the water to a pleasant blue shade, creates rich foam, and limits lime scale formation.
Instructions for use: Do not use in any way other than described in the instructions. Keep away from damaged or color-sensitive surfaces. The product is hygroscopic, so it must not come into contact with moisture or liquids before use. Do not damage the inner foil. Dissolves in water! Remove the block from the protective packaging and place it in the flush tank or cistern, not in the bowl directly. The block will color the water blue. If the water does not turn blue, the block might have moved. Ensure proper functioning and clean the tank to avoid staining.

Content: 40 g	Expiration: 36 months

HOUSE AND GARDEN

CARE FOR YOUR HOUSE AND GARDEN WITH JOY

Having a house and garden is simply a joy! A person can express themselves, shape their living space according to their own preferences, and even grow something. Thanks to modern products from Druchema, caring for your home and garden becomes a pleasure. Bio-enzymatic products help maintain fre-

shness and remove odors, while other products help eliminate unwanted „guests“ from your home. All of this is done with ease and without effort, so you can enjoy your vibrant flowers, fresh vegetables, or homegrown strawberries.

THE GARDEN IS A POEM

Why not take pride in your garden full of flowers, vegetables, and abundant crops? You will find that taking care of a garden doesn't have to be difficult. Druchema has created useful products for your gar-

den, starting with compost accelerators and liquid fertilizers, which provide nutrients to your plants and only require minimal effort. Your garden is taken care of, and all you have to do is enjoy it.

HOME „UNDER CONTROL“

Make your home cozy and well-controlled. Druchema's products will help you keep things tidy. Get rid of bad odors, unpleasant residue, and pests that may threaten your pets or home. Have everything under

control, without stress, and be ready to welcome guests. Even extensive home care doesn't have to be tiring if you choose the right tools.

PRODUCTS FOR HOME AND GARDEN CARE

- ▶ BIO GOLEM
- ▶ BIO KOMPOSTER

11100252
BIO GOLEM S

Product details: A biologically active, environmentally friendly product designed to break down organic waste in toilets, septic tanks, and home waste management systems. The product contains biological additives, including enzymes and microorganisms, that help break down organic materials and prevent the buildup of unwanted odors. Bio Golem S effectively supports the natural processes of organic decomposition and helps to maintain clean and odor-free systems.

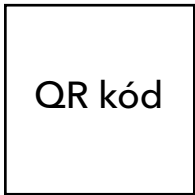

Content: 1 kg	Expiration: 36 months

TEXTILES AND FOOTWEAR

FASHIONABLE AND DRY ALL YEAR ROUND

Prolong the life of your favorite leather shoes and protect your clothing from fading, whether it's from sunlight or regular washing. Druchema products help keep your clothes and shoes in top shape and

protect them from wear and tear. In just a few moments, you can have your favorite items looking fresh again without any effort.

INSTANT FASHION LOOK

Don't rush to the stores for new fashion items. With Druchema, you can quickly freshen up your old clothes and accessories and give them a new life. Simply apply a new color or refresh the old one, and your

clothing will look as good as new in no time. Additionally, our products help protect fabrics from fading and wear, making your wardrobe look stylish as long as you want.

STAY DRY, EVEN IN THE RAIN

It's important to keep your feet dry and comfortable even during wet weather. Regular care with Druchema's products will protect your leather shoes and jackets from moisture, extending their life and keeping

them in good condition. Whether it's your leather shoes or other favorite textiles, regular maintenance will help protect them from the elements.

CARE FOR TEXTILES AND FOOTWEAR

TEXTILES AND FOOTWEAR

TEXBA® FABRIC DYE

Dye for cotton, viscose, and linen.

Product details: Fabric dye suitable for both hand and machine use.
Instructions for use: Dissolve the contents of the package in 0.5 liters of hot water and pour it into the washing machine drum. Add 0.5 kg of salt and then add the fabric. Start the washing machine on a 60°C cotton program. If dyeing by hand, dissolve the dye in a sufficient amount of hot water (60°C), add the fabric, and stir for about 30 minutes. Rinse thoroughly. Do not use for wool, polyamide, or polyester fabrics.

EASTER OVO

LUXURIOUS EASTER EGGS LIKE A PROFESSIONAL

Easter is no longer just about dyed eggs and Easter decorations with spring attributes. Druchema brings traditional and elegant colors for eggs, along with

special luxurious decoration options that anyone can master in no time, whether using traditional techniques like wax or engraving.

TRADITIONAL AND MODERN DECORATION

Whether you're a fan of classic Easter egg colors or prefer special color tones, Druchema has something for everyone. When decorating, you can try countless prints or go for a modern twist with blue tones or mo-

tifs like the famous „modrotisk“ (blue print). Younger generations often prefer stickers or heat-shrinkable wraps that make eggs look beautifully decorated with minimal effort.

OVO® LIQUID COLORS DUO
2 barvy á 20 ml - Liquid colors for dyeing eggs

Product details: Easy and practical application of liquid dyes for Easter eggs. Add 2 tablespoons of vinegar to 1/4 liter of warm water (approx. 70°C), and dissolve the dye in it. Dip the eggs into the solution and leave them until they are the desired color intensity. After removing the eggs, let them dry, and for a glossy finish, polish them with a piece of bacon fat or oil. The product contains two color tones in one package, with complementary color combinations for beautiful and vibrant egg decoration.

14653011
OVO® EFFECT RUBY SPARKS

Detail produktu: 4 gelové barvy s nádechem rubínového třpytu vhodné k originálnímu barvení velikonočních vajíček.
Návod k použití: Uvařte vajíčka natvrdo. Do vody, ve které budete vařit vajíčka, přidejte ocet (1 polévková lžice/0,5 l vody). Vajíčka udržujte stále horká. Horké vejce rychle osušte. Navlékněte si přiložené rukavice, nakapejte do dlaně 3-5 kapek barvy a krátce vajíčko poválejte v dlaní a nechte zaschnout. Pokud chcete docílit více barevného efektu, nakapejte do rukavice 1-3 kapky různých barev anebo barvy aplikujte postupně, tj. po aplikaci první barvy otřete rukavice suchým ubrouskem a postup opakujte s dalšími barvami. Rubínový efekt je možné aplikovat zároveň s barvením, tj. přidat cca 3 kapky do rukavice k barvě, nebo samostatně na již obarvená vajíčka. Nakapejte do dlaně 3 kapky rubínového třpytu a krátce vajíčko poválejte v dlaní a nechte zaschnout. Pro docílení kvalitního efektu je nutné aplikovat na horká vajíčka!

GLUES

GLUES AS A HOUSEHOLD NECESSITY

Common household repairs, crafts, modeling, and creative work - everywhere you need glue. And Druchema has several glues in its portfolio, for various purposes, surfaces, and materials. Some are for everyday household use, others are for specific needs. Druchema has been producing these for ye-

ars without losing any of their quality and has earned its rightful place on the current market. These glues are getting better in terms of design and packaging while their high-quality formula remains consistent. Therefore, glue whenever you need or desire.

SMALL HOME REPAIRS

From time to time, each of us needs to glue something at home. For example, fixing a torn photo in an album, repairing peeling wallpaper or gluing soles to shoes. For such repairs, glue is indispensable.

When there is no other solution, it's worth having a glue stick or a dispenser glue with a practical applicator for precise work.

GLUES FOR WORKSHOPS, HANDYMEN, AND PROFESSIONALS

So-called heavy-duty gluing or gluing large areas in carpentry shops or at home workshops can be easily handled with Druchema glues. These glues have the advantage of gradual bonding, allowing for the placement of glued surfaces to be adjusted before they

are set, and they mainly come in large, often multiple-liter packages. Once dried, the bonds are durable and long-lasting. Perfectly suited for wood, veneer, and fiberboard materials.

HERKULES® EXPERT

Glue for hobbyists and model makers

Product details: Herkules Expert is a new addition to this traditional brand's product line. The glue is known for its strong bonding strength and excellent working properties, provided by the light bottle and pencil-shaped applicator.

Instructions for use: For the user, working with the glue is easier thanks to the innovative applicator. The applicator is designed in a sharp, pen-like shape, making it easier and more precise to apply glue in small spaces or gaps. It also allows for the correction of the amount of glue applied and protects fingers, other materials, and tools from getting stained by glue.

Content: 130 g	Expiration: 36 months
Units per pack: 24	EAN: 8594825005569

DISKONT® 5kg

Special dispersion glue based on acrylic copolymer dispersion

Product details: DISKONT is a special dispersion adhesive that forms a permanent adhesive film. Bonded surfaces can be separated and rejoined without the adhesive losing its properties, especially its adhesiveness. Thanks to these characteristics, it is particularly suitable for bonding floor coverings, billboards, posters, pictures, and similar materials. It is designed for bonding absorbent and non-absorbent materials, in all variants: absorbent/absorbent, absorbent/non-absorbent, and non-absorbent/non-absorbent.

Instructions for use: Apply the adhesive in a thin layer on one surface designated for bonding. Join immediately if at least one of the materials is absorbent. For non-absorbent surfaces, allow the applied adhesive to dry, forming a black film, and then press both parts together with pressure.

Content: 5 kg	Expiration: 36 months

STAINS AND COATINGS

SPECIAL COATINGS FOR LONGER DURABILITY

Every material has its lifespan, but with the help of special stains and additional coatings, it is possible to extend the life of wood even more. And because Druchema mainly focuses on practical and affordable solutions for customers, it hasn't forgotten about unique products that save time and ensure comfort and ease. These stains and coatings are designed to

extend the life of wood, restore its original properties and strength, or bring a natural look and shine. Special coatings also take care of specific requirements like repelling water and moisture from bricks or protecting the fireplace and chimney from the usual wear caused by heating.

BETTER TO STAIN WOOD THAN THROW IT AWAY

Popular garden furniture often ends up in the trash or on the scrap heap, just because it starts to lose its color and look worn. However, the right stain can return wood to its former glory. It can deeply penetra-

te the wood and restore its natural beauty, helping the wood to last much longer. With proper care, old wood can be revived and look like new, turning it into a beautiful piece once again.

WITH SPECIAL COATINGS IN THE HEAT

Moisture from the house or leaky pipes can cause significant issues that we become aware of in summer heat. That's why it's crucial to combat moisture effectively and prevent the harmful effects of acidic rain, dirt, and

temperature fluctuations, which can damage materials and create problems. Specialized coatings can deal with these issues, ensuring that the materials stay dry and protected even in such conditions.

SELECTION OF STAINS AND COATINGS

► SPIRIT-BASED STAIN

► HYDRO-WAX

► ZÁŘENKA

► SILVER PAINT

► LUKOFOB

STAINS AND COATINGS

SPIRIT STAIN
Liquid spirit stain for wood, OSB boards, chipboard, and other porous materials.

Product details: Spirit stain is a suitable means for coloring porous materials (such as wood, OSB boards, chipboard). The stain penetrates deep into the material's structure, allowing it to accentuate the natural pattern of the wood. After application, the surface can be coated with transparent varnishes, waxes, or other coatings. This stain is suitable for both indoor and outdoor use, provided the stained surface is treated with a protective layer. It is available in a variety of shades, allowing the customer to choose the one that best matches their needs. It is recommended to use it in a well-ventilated space.

11460352
HYDROVOSK Light Oak
Wax emulsion for treating wood and floors

Product details: Hydro wax is used for the surface treatment of natural wood in interiors. It is used to maintain and protect furniture, wood products, or wooden floors. Hydro wax adds a water-repellent effect, protecting against moisture, dirt, and minor mechanical damage. The wax-treated surface gains a silky finish with a subtle sheen. Hydro wax is particularly suitable for wooden floors and can be applied regularly as part of maintenance.
Instructions for use: Apply the hydro wax by diluting it with water and applying it to the wood surface with a soft cloth or mop. The treated area should dry in 2-3 hours.

Content: 1 l	Expiration: 36 months

???
LUKOFOB 39
Coating against moisture and dirt for walls, stone, etc.

Product details: A concentrated silicone water-repellent coating reduces absorbency, dirt accumulation, increases durability, and protects against acidic rain. It improves the thermal insulation properties of porous silicate-based building materials. It is used for spraying or dipping porous silicate materials, such as plaster, concrete, aerated concrete, burnt roof tiles, sandstone, etc., to which it chemically binds.
Instructions for use: When applied, the diluted Lukofob solution penetrates the porous substrate, dries, and forms a colorless film with a highly water-repellent effect while maintaining its original vapor permeability.

Content: 500 ml	Expiration: 36 months
Units per pack: 12	EAN: 8594825008676
Units per pallet: 864	ITF: 18594825008673

ART SUPPLIES

FOR THE ENTERTAINMENT OF CHILDREN AND ADULTS

Developing children's abilities and creativity can be achieved primarily through creative activities such as drawing, modeling, and other crafts. Children are also more entertained when they can create things on their own and learn new skills in a simple and fun way. The enjoyment of creating can sometimes even

captivate adults as well, making it a shared activity. Therefore, Druchema has included in its product range various items that fall under the category of art supplies. In addition to creative modeling materials that can be shaped as desired, they also offer school supplies and items like Christmas nativity sets.

MODELING AS YOU WISH

Keep children entertained with modeling, which can be both fun and educational. They can create their favorite characters, animals, and the simplest figures. Adults, on the other hand, can use the materials to create ornaments and jewelry. Thanks to the malleability of the modeling materials, the items created

can always be changed or adjusted, allowing the fun to continue. In cooperation with parents, children can make interesting homemade gifts and trinkets that will inspire creativity and help them develop their skills.

SPORT

THOSE WHO WAX, GO FASTER

Every passionate sports enthusiast knows that without proper waxing, their equipment will not perform well, whether on snowy slopes or cycling trails. Therefore, it is essential to take proper care of your winter and summer sports gear to ensure you can fully enjoy its best features. Whether you are a fan of skiing or cyc-

ling, Druchema should always be by your side. Druchema offers products not only for skis, cross-country skis, and snowboards but also for bicycles. Give your sports equipment the care it deserves, and in return, enjoy perfect sports experiences.

KING OF THE SLOPES AND WHITE TRACKS

Skiing is one of the most popular winter sports. Before heading to the mountains, it is important to check the condition of your skis or snowboard, especially their base. Removing old wax from last season, cleaning the base, and applying new wax should be as natural

as avoiding skiing on closed trails. Only with the right wax and base treatment will you experience a smooth ride, perfect glide, and maximum enjoyment from the sport.

CROSS-COUNTRY CYCLING

Checking the condition of your bicycle before the first ride, basic servicing, lubricating moving parts, or loosening rusted bolts are essential for a safe ride. Druchema has products for all these needs. Whether you are

cycling across various terrains or just enjoying the ride, having the right equipment and maintenance is key to avoiding problems and fully enjoying the experience.

SKIVO OLYMPIA

First wax for freshly fallen snow

Product details: A cross-country ski wax designed for gaining better grip on snow. It is especially suitable for use on freshly fallen snow or fine-grained snow at low temperatures. The wax's ability to absorb moisture and its anti-slip effect help improve skiing efficiency and comfort. SKIVO Olympia waxes are formulated for high performance in different temperature conditions, ensuring long-lasting grip.

SKIVO PARAFFIN

Paraffin for cross-country and downhill skis

Product details: Ensures good glide for ceoss-country and downhill skis and snowboards on all types of snow at various temperatures. It serves as a base wax for basic maintenance and ski preservation. To ensure long-lasting waxing, we recpmmend paraffinwaxes for sliding surfaces. Apply the wax to a cleaned sliding surface free of old wax residues and dirt. Heat the iron to a temperature of 120-140 C.Place the wax against the iron to warm it up, then quickly apply it to the sliding surface and spread it. Repeat the process along the entire lenght of the sliding surface to achieve an even wax application(to avoid direct contact between the iron and the sliding surface). Now meltthe wax into sliding surface, always maintainingsmooth movements from tip to tail. One stroke of ironing should last about 20 seconds. Allow the skis to cool to room temperature. During cooling, the sliding surface absorbs the necessary wax into its pores. Remove excess wax with a Skivo plexi scraper. Finally, polish the surface with a soft polishing brush and finish with a Skivo cloth.

AUTOCOSMETICS TEMPO

BEHIND THE WHEEL LIKE AT HOME

As the number of vehicles on the roads increases, so does the demand for high-quality car care products. Druchema, with its own brand TEMPO, helps you take care of your four-wheeled friend both inside and out.

The product range includes car shampoos, polishing agents for the body and windows, and cleaning products for interiors.

NOT JUST FOR SUMMER TRAVEL

Winter is one of the most challenging seasons for cars, due to severe weather conditions such as snow, salt, and dirt. Druchema's winter program offers products that ensure better visibility through windshields and

help protect your car from frost and ice. Using the right winter products helps ensure that your vehicle stays in good condition, making winter driving safer.

YOUR CAR LIKE NEW FROM THE SHOWROOM

Maintaining a beautiful car exterior requires careful washing, polishing, and the right care. Druchema's car care line includes waxes and polishers that bring back the shine of the car's surface and ensure long-term pro-

tection. Whether you're using a car shampoo, an automotive wax, or plastic cleaners, with TEMPO products, your car will look as good as new.

TEMPO® PASTE

Polishing paste for cleaning, polishing, and conserving older car paint

Product details: TEMPO Paste is designed for cleaning, polishing, and protecting older car paint. It removes dirt and small imperfections from the surface, restoring the original gloss. The paste creates a protective layer that prevents weathering and oxidation, extending the lifespan of the paint. It's suitable for manual or machine polishing.

Content: 120 g	Expiration: 36 months
Units per pack: 20	EAN: 8594825006139
Units per pallet: 1800	ITF: 18594825006136

13121021

TEMPO® CAR POLISH

Liquid polish with high gloss for paint and metal

Product details: Emulzní leštěnka na rychlé ošetření a přešetření umytých ploch karoserií, včetně metalíz. Je vhodná zejména pro ošetření novějších autolaků. Contentuje přírodní a minerální oleje. Odstraňuje nečistoty rozpustné ve vodě nebo organických rozpouštědlech, které zůstaly na povrchu po běžném mytí. Oživuje matné nátěry a vyrovnává barevné odstíny po opravách na povrchu karoserií.
Instructions for use: Autoleštěnku nanášejte na čistý a suchý autolak měkkým hadříkem nebo houbou. Po zaschnutí doleštěte do vysokého lesku lešticí utěrkou, případně ručním elektrickým nářadím (leštičkou) s vhodným měkkým leštícím potahem.

Content: 300 ml	Expiration: 36 months
Units per pack: 10	EAN: 8594825001509
Units per pallet: 1200	ITF: 18594825001506

13100041

TEMPO® PASTE

Polishing paste for cleaning, polishing, and conserving older car paint

Product details: This is a larger version of the TEMPO Paste, suitable for those who need more product for larger areas or frequent use.

Content: 1 kg	Expiration: 36 months
Units per pack: 6	EAN: 8594825002483
Units per pallet: 288	ITF: 18594825002480

13162021

TEMPO® SILICHROM® EX

Cleaner for chrome and metal parts on motorcycles and cars

Product details: TEMPO Silchrom EX is a paste designed to clean and polish chrome and metal parts. It removes oxidation, restores shine, and creates a protective layer. Ideal for both motorcycles and cars, it ensures long-lasting protection and a shiny surface.

Content: 120 g	Expiration: 36 months
Units per pack: 20	EAN: 8594825000458
Units per pallet: 1800	ITF: 18594825000455

13110022

TEMPO® CAR CREAM

Liquid polish with high gloss for paint and metal

Product details: Paste for cleaning and polishing new car paint and metal surfaces
Instructions for use: This polishing paste is designed to maintain and enhance the look of new car paint, providing a glossy finish and protection. It can also be used on metal parts.

Content: 120 g	Expiration: 36 months
Units per pack: 20	EAN: 8594825006146
Units per pallet: 1800	ITF: 18594825006143

13190031

TEMPO® WHEEL CLEANER

Cleaner for removing dirt from wheels and discs with a spray nozzle

Product details: A wheel cleaner that easily removes dirt and brake dust from wheels. The product is applied with a spray nozzle for easy application and ensures a clean, shiny finish for your wheels.

Content: 500 ml	Expiration: 36 months
Units per pack: 6	EAN: 8594825001639
Units per pallet: 450	ITF: 18594825001636

13172021
TEMPO® RENOPLAST
Silicone polish for tires and plastics

Product details: A silicone-based product for cleaning, treating, and protecting rubber and plastic parts of the car. It gives surfaces a fresh, glossy appearance while protecting them from aging and cracking. Regular use keeps the plastic and rubber parts looking new and extends their lifespan.

Content: 300 ml	Expiration: 36 months
Units per pack: 10	EAN: 8594825001462
Units per pallet: 1200	ITF: 18594825001469

13170721
TEMPO® RENOPLAST WITH BLACK BRUSH
Silicone polish with an applicator brush for cleaning and protecting tires and plastics

Product details: A silicone-based product with an integrated brush for easy application. Ideal for cleaning, polishing, and preserving rubber and plastic parts of the car, such as tires and exterior plastic trims. It provides a long-lasting shine and protection.

Content: 300 ml	Expiration: 36 months
Units per pack: 10	EAN: 8594825002964
Units per pallet: 1200	ITF: 18594825002961

53310351
TEMPO® NANO ANTIFREEZE WASHER FLUID
Nano-technology based antifreeze windshield washer fluid for all weather conditions

Product details: Special antifreeze washer fluid for all types of vehicles. It is effective down to -80°C and uses nano-technology to create a hydrophobic coating on the windshield, ensuring better visibility in adverse weather conditions. Can be diluted as needed.

Content: ???	Expiration: 36 months
Units per pack: ???	EAN: ???
Units per pallet: ???	ITF:

13190031
TEMPO® BASIC ANTIFREEZE WASHER FLUID
Antifreeze washer fluid for windshield wipers in all weather conditions

Product details: Basic antifreeze washer fluid that provides effective cleaning and freeze protection down to -30°C. Suitable for all types of vehicles and ensures clear visibility during winter conditions.

Content: ???	Expiration: 36 months
Units per pack: ???	EAN: ???
Units per pallet: ???	ITF:

11230031
TEMPO® GLASS CLEANER
Glass cleaner for car windows

Product details: Specially formulated glass cleaner for removing dirt, fingerprints, and smudges from car windows. It leaves a streak-free, clear surface and enhances visibility.

Content: 500 ml	Expiration: 36 months
Units per pack: 6	EAN: 8594825001707
Units per pallet: 450	ITF: 18594825001704

23190531
TEMPO® BUG REMOVER
Insect remover for car windows and bodywork

Product details: A cleaner designed to remove stubborn bug splatters from car windows, headlights, and bodywork. The formula is tough on residues but gentle on the car's surface, leaving a clean, streak-free finish.

Content: 500 ml	Expiration: 36 months
Units per pack: 10	EAN: 8594825003398
Units per pallet: 540	ITF: 18594825003395

13330332

TEMPO® DE-ICER

For removing frost from windows, mirrors, and freeing frozen locks

Product details: TEMPO De-Icer effectively removes frost from car windows, mirrors, and locks, making them clear and functional. The product is easy to apply and works quickly to eliminate ice, ensuring safe driving conditions. It does not damage rubber or plastic parts of the vehicle, and it also protects the glass from future frost build-up.

Content: 500 ml	Expiration: 36 months
Units per pack: 10	EAN: 8594825009673
Units per pallet: 540	ITF: 18594825009670

53250921

TEMPO® SILICONE OIL SPRAY

Removes dirt and insects from cars

Product details: Silicone oil spray is suitable for use in both home and automotive applications. It is ideal for lubricating and protecting moving metal and plastic parts such as hinges, locks, and other components. The spray provides a waterproof layer that prevents corrosion and wear, ensuring smooth operation even in difficult conditions. It is also excellent for preserving rubber and plastic surfaces.

Content: 300 ml, sprej	Expiration: 36 months
Units per pack: 10	EAN: 8594825003114
Units per pallet: 1100	ITF: 18594825003111

13200721

TEMPO® MD SPECIAL

Universal lubricating spray with anti-corrosion properties

Product details: MD Special is a universal lubricant designed to loosen rusted bolts and screws, lubricate metal parts (such as chains, hinges, and locks), and provide long-term protection against rust and corrosion. It penetrates deep into rusted areas, releasing them, while its protective properties extend the life of treated components.

Content: 300 ml, sprej	Expiration: 36 months
Units per pack: 10	EAN: 8594825003060
Units per pallet: 1100	ITF: 18594825003067

13210921

TEMPO® KONTAKTOL SPRAY

Cleaner and protective spray for electrical contacts

Product details: Contactol spray is designed to clean and protect electrical contacts from corrosion and oxidation. It ensures smooth electrical conductivity and extends the life of electronic components by preventing the accumulation of dirt and moisture.

Content: 300 ml, sprej	Expiration: 36 months
Units per pack: 10	EAN: 8594825003053
Units per pallet: 1100	ITF: 18594825003050

SPECIAL PRODUCTS

???

INDIKAL

For detecting cracks and leaks during welding

Product details: A product for detecting cracks, rust, and leaks in metal and non-metallic materials, as well as faulty welds and connections. It is used in mechanical engineering, construction, and other industries. Indikal is applied to the surface, and after it dries, it reveals any imperfections in the material.

???

SOLAGEL

Heat-modifiable gel for casting and molding

Product details: Solagel is a casting material that can withstand pressure up to 30 MPa. The mold material adapts to the surface of the cast object, allowing for precise detailing. The gel changes its form when heated, becoming more pliable and suitable for casting or molding various materials.

???

MOP OIL

Oil for cleaning and dust removal

Product details: A special product designed for removing dust and dirt from floors, especially non-absorbent surfaces like linoleum or tile. Mop Oil is applied to the mop head or floor to pick up dust effectively, leaving the surface clean and dry.

CUSTOM MANUFACTURING

Druchema, as a traditional Czech, but also modern European-format company, strives to continuously improve its work and services in all aspects.

Therefore, the primary focus of Druchema is to satisfy the needs and demands of its customers, This is where custom manufacturing comes into play, which become an integrak part of our priorities and activities. Druchemaoffers the possibility of producing products according to specific customer needs under the Private Label brand. It provides full services from the production of chemical raw materials to packaging, labeling, and furher support for products in all aspects.

If you have an idea, a product, or just a vague concept and are unsure how to proceed, we are here to help! We provide:

a) development, testing an adjustment in the following areas:

Household

- Cleaning and soap products
- Polishing productsy

House and garden

- BIO enzymatic cleaners
- Fertilizers
- Decorative and functional coatings

Care for textiles, shoes, and leather goods

- Cleaners and creams
- Paints and textiles

Easter products

Adhesives

Mořidla a nátěry

- Paints and varnishes for water and solvent-based systems
- Speciial paints

Art supplies

Sport products

- Waxes for skis
- Bicycle oils
- Car cosmetics

Special products

- Fingerprint foil
- Dye ribbons

And, of course, in any other area according tothe specific requirements of the customer

b) complete provisions of custom service in these areas:

Development

New products according to current customer needs

Private label

Private Label product supplies

Custom manufacturing

Precise delivery according to the customer's requirements

Provider of

Chemical intermediates, packaging, and labels

Mixing

Liquid and powder products

Packaging and labeling

Preparation and packaging of liquid and powder products into various packages such as bottle, cans, bags, barrels, or IBC containers, ranging from 30 ml - 1000 litrů with contents of 5 g - 1000 kg

Quality control

Using various analytical methods, such as refractometry, ph-metric, conductivity, chemical resistance tests, visual inspection, adhesion tests, non-flammability,UV-VIS specter

Consulting

In the area of strategic production or based on customer's packaging and labeling

Testing

SIn our own accredited laboratory

Development

Customized soutions with our own microbiological laboratory
